

Southeastern Interfraternity Conference
Mission, Vision and Strategic Goals
(February 2009)

Our Mission

To strengthen fraternal communities throughout the Southeastern United States through quality programs, training and services to fraternity men and those who advise and support fraternity men.

Our Vision

The Southeastern Interfraternity Conference will be the regional leadership academy of choice for fraternity men throughout the Southeastern United States and for all other fraternity communities seeking quality education, training and development opportunities. SEIFC will provide a uniquely high quality regional conference experience designed to provide officer training, collaboration among and between governing councils, and engaging, relevant educational programs.

Our Strategic Goals

1. SEIFC will continue to focus resources on high-quality officer training programs developed for key areas within the Greek council governance structure through the continued development of the CORE program.
2. SEIFC will provide structured, interactive educational sessions that will allow fraternity councils to learn operational concepts, various models related to leadership and change, and the opportunity to develop goals and objectives relevant to their work within the fraternity community on their campus through an institute-like curriculum.
3. SEIFC will recruit outstanding facilitators and trainers to support the educational mission of the conference and provide the best educational programming available to fraternity men.
4. SEIFC will promote diversity and intercultural competence by developing officer training and council development curriculum based on learning outcomes that are universally applicable to council leaders regardless of the governing council from which they come, and will recruit a diverse pool of speakers and facilitators to present those programs.
5. SEIFC will provide intense, relevant, high-quality training for Greek advisors and other student affairs professionals on topics that will promote competency in areas key to their work with fraternity communities.
